

AI + Robotics Camp

[Overview](#) [20 Days](#) [Routes](#) [Competition](#) [Parents](#)

20-DAY CHINA AI + ROBOTICS SUMMER CAMP

Build Robots, Train Ideas, Explore China

A hands-on AI and robotics camp for teenagers: two weeks of classes and team engineering studio, Friday-Saturday road trips, optional Sunday deep dives, university visits, a robotics competition, final showcase, and a closing dinner.

[View daily plan](#)[Choose city route](#)[English brochure](#)[中文资料册](#)

AI + Robotics, With a Real Final Outcome

Students learn robotics foundations, AI literacy, sensors, control logic, teamwork, debugging, and presentation skills. Each team builds toward a robot challenge and final showcase instead of only attending lectures.

Teen-centered

Designed for culturally and racially diverse international students, with age-appropriate supervision.

Robot competition

Day 17 verifies learning through a robotics challenge, team pitch, and final showcase.

Five route options

Xi'an, Shanghai, Hangzhou, Xiamen, or Beijing road trip modules with university visits and scenic learning.

20-Day Daily Schedule

Saturday arrival, Sunday warm welcome, two learning weeks, Friday-Saturday road trips, Sunday rest or optional deep-dive activities, then robotics competition, final showcase, Shanghai discovery, and return preparation.

Diverse teenagers arriving for an AI robotics camp

DAY 1 SAT

Arrival and Safety Setup

Airport or station pickup, check-in, safety briefing, room setup, team icebreakers, and camp expectations.

Teenagers joining a warm welcome session

DAY 2 SUN

Warm Welcome

Opening ceremony, campus or neighborhood orientation, team formation, robotics kit introduction, and welcome dinner.

Teenagers learning robotics basics

DAY 3 MON

Robotics Foundations

Robot structure, motors, sensors, safety rules, team roles, and first build challenge.

Teenagers programming small robots

DAY 4 TUE

Coding and Control

Block or Python-style logic, movement control, loops, conditionals, debugging habits, and testing logs.

Teenagers testing AI robotics projects

DAY 5 WED

AI Literacy Lab

Computer vision concepts, data bias, model thinking, responsible AI, and sensor-based mini tasks.

Teenagers working in teams with robot kits

DAY 6 THU

Team Engineering Studio

Teams define strategy, improve chassis design, assign roles, and prepare road-trip observation tasks.

Xi'an route teenagers with robotics and heritage learning

DAY 7 FRI

Road Trip 1A

University visit or city technology observation. Route may include Xi'an Jiaotong, Fudan, SJTU, Zhejiang University, Xiamen University, Tsinghua, or Peking University.

Shanghai route teenagers on robotics road trip

DAY 8 SAT

Road Trip 1B

Scenic learning connected to city culture and engineering thinking: landmarks, museums, ancient towns, coastlines, or heritage sites.

Teenagers resting and self studying during camp

DAY 9 SUN

Rest, Optional Deep Dive

Rest, self-study, supervised project catch-up, or optional activities such as maker workshop, calligraphy, tea, sport, or local culture.

Teenagers prototyping robotics improvements

DAY 10 MON

Robot Mission Design

Teams define the competition mission, scoring strategy, field constraints, and technical risks.

Teenagers building sensors into robots

DAY 11 TUE

Sensors and Autonomy

Line tracking, obstacle detection, camera or distance sensing, calibration, and data notes.

Teenagers debugging robots with laptops

DAY 12 WED

Debugging Sprint

Iterative testing, version notes, failure analysis, repair routines, and peer review.

Teenagers preparing robotics presentations

DAY 13 THU

Presentation Studio

Teams prepare engineering notebooks, demo scripts, robot pitch decks, and road-trip learning links.

Hangzhou route teenagers with robotics road trip

DAY 14 FRI

Road Trip 2A

Second university or innovation visit, based on selected city route and confirmed availability.

Xiamen route teenagers doing coastal robotics field study

DAY 15 SAT

Road Trip 2B

Scenic exploration: Terracotta Warriors, Suzhou or Wuxi, West Lake and Xitang, Xiamen coastal sites, Great Wall, or Old Summer Palace.

Teenagers rehearsing robotics competition

DAY 16 SUN

Rest, Self-Study, Rehearsal

Optional deep-dive activity, robot repair time, final testing, showcase rehearsal, and material check.

Teenagers competing with robots

DAY 17 MON

Robotics Competition

Robot challenge rounds, judging, engineering notebook review, team pitch, final showcase, certificates, mentor feedback, and closing dinner.

Teenagers exploring Shanghai after robotics camp

DAY 18 TUE

Shanghai Discovery

Shanghai city highlights, science and technology museum or zoo if available, culture walk, and light shopping time.

Teenagers packing robotics camp projects

DAY 19 WED

Return Preparation

Pack luggage, collect project files, export photos and videos, confirm flights, review certificates, and prepare transfers.

Teenagers departing after AI robotics camp in China

DAY 20 FLEX

Departure Window

Departure according to flight schedule. Late Day 19 or early Day 20 departures can be accommodated in the final plan.

Five Road Trip Route Options

Each route keeps the same AI + Robotics academic spine. Friday-Saturday road trips can combine university visits, innovation exposure, and scenic learning.

Xi'an AI robotics route for diverse teenagers

XI'AN

Xi'an Jiaotong + Terracotta Warriors

Visit Xi'an Jiaotong University for engineering inspiration, then explore the Terracotta Warriors and historic city culture.

Shanghai AI robotics route for diverse teenagers

SHANGHAI

Fudan, SJTU, Suzhou, Wuxi

Explore Shanghai city views, visit Fudan University and Shanghai Jiao Tong University, with Suzhou and Wuxi road trip options.

Hangzhou AI robotics route for diverse teenagers

HANGZHOU

Zhejiang University + Westlake University

Visit Zhejiang University and Westlake University, then explore West Lake and Xitang water town.

Xiamen AI robotics route for diverse teenagers

XIAMEN

Xiamen University + Coastal Scenic Sites

Visit Xiamen University and nearby famous scenic spots reachable within a few hours by car, based on season and logistics.

Beijing AI robotics route for diverse teenagers

BEIJING

Tsinghua, Peking University, Great Wall

Visit Tsinghua and Peking University, then explore the Great Wall, Old Summer Palace, and other major Beijing landmarks.

Robotics Competition and Final Showcase

The final Monday is not just a ceremony. It validates learning through robot performance, design explanation, teamwork, and communication.

Robot Challenge

Teams compete in a mission such as navigation, delivery, line tracking, obstacle avoidance, or a route-specific field challenge.

Engineering Review

Judges review notebooks, iteration choices, debugging notes, responsible AI thinking, and team role distribution.

Final Showcase

Students present their robot, demo video, road-trip insight, and improvement plan to peers, mentors, and invited guests.

Closing Dinner

Certificates, mentor comments, photo moments, family-ready highlights, and farewell dinner.

Plan a Camp Cohort

Share student age range, group size, preferred dates, target route city, robotics experience level, dietary and health notes, and whether Sunday optional deep-dive activities are allowed.
